FOR YOUR PEACE OF MIND

AC100 Video, Movement & Sound Monitor

## THE ALARM WOKE US SO WE COULD CALL 999

### Crucial for Peace of Mind

We have two of these Monitors as we have twin boys. I didn't really think the Sensor Pad would be so important to us, but on two occasions it possibly saved one of my boy's life.

### Scared to Sleep

He was very tiny and grunted a lot. We didn't know why until he was later diagnosed with severe reflux. He kept being sick after feeds but also in his sleep. I was scared to go to sleep at night but on two occasions I was woken to find he was frothing at the mouth and struggling to breath and on one of the occasions he wasn't breathing until I picked him up.

*"The alarm on his monitor woke me! I grabbed my baby boy and cleared his mouth. He struggled to breathe until the ambulance got to us."*

### We Cleared His Mouth & Called 999

The alarm on his monitor woke me! I grabbed my baby boy and cleared his mouth. He was struggling to breathe until the ambulance got to us but was back to normal within a few hours. I don't know how long he was like this before we woke but I'm guessing it wasn't long because the Sensor Pad sounded.

### We Couldn't Live Without Monitors

I hate to think what would have happened if I hadn't of had it, we could have lost one of our boys those nights. I totally recommend these Angelcare Baby Monitors and Sensor Pads. They are worth every penny and more. My boys still suffer from reflux but are much better now on a special milk, but it doesn't stop me using my Angelcare Monitors.
