FOR YOUR PEACE OF MIND

AC403 Movement Only Monitor

OUR MONITOR ALERTED US TO SAVE OUR BABY

A Traumatic Night

I just wanted to send an email thanking Angelcare in general. When my baby was 2 months old I wasn't in the same room as her due to an emergency with my husband and we were waiting for an ambulance.

Face Down, Not Breathing

We were downstairs waiting when I thought my baby was fast asleep upstairs. All of a sudden the alarm went off and I ran upstairs and my baby had somehow managed to roll onto her front.

Alarm Made Me Take Action

I picked her up and she was purple and as soon as I lifted her out of the cot she gasped for air. Had I not had the Angelcare Movement & Sound Baby Monitor there is no doubt in my mind my baby would have died.

Thank You Angelcare

I just wanted to thank you so much and as I am pregnant again I will be purchasing again. Just on reflection I wanted to write a thank you email. So thank you.

“ Had I not had the Angelcare Movement and Sound Baby Monitor there is no doubt in my mind my baby would have died. ”

OUR ALARM WOKE HER TO BREATHE

A sincere and heartfelt thank you to everyone involved in the existence of your Angelcare Baby Monitors. From the Designers and Technical Engineers to the Marketing Department.

Woken Up To Breathe

There's been multiple times when the Angelcare Baby Monitor has sounded its alarm. After 20 seconds of detecting no movement in her cot, the alarm sounded and woke my baby girl. The sound of the alarm wakes her to remind her to breathe.

We Knew Something Was Wrong

Tonight at almost 4 months old she didn't wake as easily as normal. Upon hearing the alarm, my husband and I ran as fast as they could to her bedside.

After picking her up and taking time to rouse her from a very deep sleep, we now have a safe and happy baby.

An Essential Home Device For Safety

If it weren't for every single one of you that has made it possible to have this device at home, my heart would have been broken forever tonight.
